Particolari - Details

Collezione progettuale e personalizzabile nelle lunghezze. I vetri in borosilicato sono made in Veneto e sono successivamente decorati per creare luce diffusa e armoniosa. Le boccole di congiunzione sono in alluminio tornito e fresato su disegno. La loro forma tondeggiante consente il movimento della collana Dewy e permette di poterla adattare nelle curve e forme.

All'interno un neonflex 360° percorre l'intera collana senza interruzioni di luce.

Possibilità di scegliere 3000 k / 4000 k

A design collection that can be customised in lengths. The borosilicate glass panes are made in Veneto and are subsequently decorated to create diffuse and harmonious light. The joint bushings are made of turned and milled aluminium according to design. Their rounded shape allows the Dewy necklace to move and can be adapted in curves and shapes.

Inside, a 360° neonflex runs through the entire necklace without interruption of light.

Choice of 3000 k / 4000 k

Theorem

Particolari - Details

Theorem è una collezione che nasce dallo studio della luce e la sua propagazione. La fonte luminosa inserita sulla base riflette su una sfera in borosilicato con doppia decorazione: oro lucido/cromo lucido – bianco latte. Ruotando manualmente la sfera e quindi la destinazione della luce si ottengono propagazioni differenti del fascio di luce. Base in legno tornita su disegno. Legno noce/frassino. Cilindro in vetro borosilicato; Diffusore in PMMA opalino tagliato laser.

Theorem is a collection born from the study of light and its propagation. The light source inserted on the base reflects on a borosilicate sphere with a double decoration: shiny gold/chrome - milk white. By manually rotating the sphere and thus the destination of the light, different propagations of the light beam are obtained. Wooden base turned to design. Walnut/ash wood. Borosilicate glass cylinder; laser-cut opaline PMMA diffuser.
